Dear Colleagues!

We cordially invite you to participate in the work of the IX Regional Arrhythmology School with International Attendance n.a. Academician Vikenty V. Pekarsky “State-of-the-Art Methods of Interventional Arrhythmology” that will be held in Tomsk, Russia, on April 27-28, 2017.

In a framework of the School, the leading national and foreign specialists will give lectures. Online translations from the operating room, grand rounds, roundtables, and theoretical and practical seminars will be organized.

The format of the School will provide an opportunity to participate in the discussions on the most relevant problems of clinical electrophysiology and interventional arrhythmology as well as an opportunity to communicate with long-time colleagues in a warm and a friendly atmosphere which has become a tradition already.

You will also have an opportunity to learn about cutting edge medical equipment from the leading manufacturers in this field.

After completion of the School, a certificate of specialization at workplace will be available.

Participation in the School is free. Travel and accommodation expenses should be covered by sending organizations. Classes will be delivered in a format of lectures and roundtable discussions.

Please let us know as soon as possible if you would like to participate in the work of the conference: press@cardio-tomsk.ru.

Sincerely yours,

Professor Sergey V. Popov, MD, PhD, Member of RAS
Director of Cardiology Research Institute,
Head of the Department of Surgical Treatment
of Severe Arrhythmias and Cardiac Pacing
Cardiology Research Institute
